-------	---	--	----------------------------

REMARKS; INTERPRETATION: * Small granite pieces mostly from pocket of granite dust and/or very small frags. just above large sherds in 2

** 2-2a excavated together except for N Quadrant where 2a taken out saved separately - elsewhere mixed in tray

* 2 large diagenetic pieces fit to form side of crude red ware vessel (black at fracture) that seems to fit against N side of FH14 - contours may match Many small pottery chips from 2 large pieces
