Stratigraphic Matrix

Your interpretation: Internal External Structural Other (specify)

Your discussion: 21959 appears to be a cut created by running water. ~~May be part of s.~~ 21959 cuts through layers \_\_\_\_\_ and sand layer down to \_\_\_\_\_, a layer of mud similar in appearance to \_\_\_\_\_. Thus, cut 21959 appears to be the 2nd (at least) event of running water damage which was then patched with \_\_\_\_\_.
