| Your interpretation: Filled-in cut | Internal | External | Structural | Other (specify) |
| Your discussion: | | | | |
| <p><i>Based on the squared shape and straight edges of the deposit, it appears to be a cut that has been filled in with this material, either naturally or intentionally. This feature is parallel to a standing wall and may have been cut to facilitate the construction of this wall. The extent of the cut is unknown in this pre-excitation phase, though probing with a trowel reveals fairly shallow slope along the southern edge.</i></p> | | | | Placement in square  |
