Discussion and interpretation:

Five ~~four~~ sandy silt bricks to the west of silos 33-438 and 33-437. These four bricks appear to be remains of an earlier wall or platform. Pre-date silos building complex. It is ~~is~~ covered by a clayey floor (33,418), which occupied in silos room. It suggest that these brickly bonding dates to the same period of the walls (34571) and wall (34510).

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.

Sketch Plan - Include square numbers, North arrow, space numbers, and elevations.
