Your discussion:																																		
<p>This deposit is another episode of the well rubble and was observed in section in pit (29867) during 2008 season. It appears to be a wind blown sand vesting between two other layers of the well rubble (29882 and 29900), with quite large fragments of mudmass contained within it.</p> <p>3-4 pos. islamic coins found within this context! There is an islamic burial cell pos. through this context and one below (29900)</p>
