| <p><i>While completing excavation of burial cut 29455, this loose sandy fill of a cut burrow was uncovered on the western wall of the burial. The southern most portion of this burrow was already exposed, but the northern extent was still covered by fill 29610. The collapsed portion of this burrow fill that spilled into the burial cut was screened separately and collections were also made separately from this screened material.</i></p> | | | | |
