Your interpretation: mud (possibly bricks?) associated w/ stone wall 30002		Internal	External	Structural
		Other (specify)		
Your discussion:				
<p>This band of mud is more compact than the surrounding deposits, with a hint of a render line on the extreme east portion of what remains (along the southern edge of the band). It appears to be the core/cement material for stone limestone wall 30002. Probing the edge of this deposit revealed the limestone crusher (likely 30004) ~4cm from surface.</p>				Placement in square
