Type of feature:				
Stratigraphic Matrix				
Your interpretation: <b>Silt associated w/ wall 29992</b>		Internal      External      Structural      Other (specify)		
Your discussion:				
<p>This silty deposit is ~2cm deep where probed, revealing limestone base material 30010, thus appears to have collected in the space between the cleared base material and the wall, possibly as a construction action to support the base of the wall after completion.</p>				Placement in square
