Your interpretation:

	Internal	External	<u>Structural</u>	Other (specify)
--	----------	----------	-------------------	-----------------

Your discussion: Very degraded mudbrick structure which has an unclear relationship between walls 21876, 29563 & other walls within 101.529. & 101.528. The mudbrick slumps down into the space with deposit layer 30029. It appears that at some point there may have been a rebuilding of walls to define smaller areas or rooms. The dip at the eastern edge perhaps would have formed an entrance way or just a corner which was used as some sort of pit or fill. It was difficult to determine the outlining of actual brick work.
