Your interpretation:				
	Internal	External	Structural	Other (specify)
Your discussion:				
<p>Med. sandy clay layer which is apparently a part part of the wall [21876] very eroded.</p> <p>It could be the same layer that (29435) (29391) was above it. And it appears that the layer is larger and extent to the E. (1.24 m. wide E/W) and more large to the N (2.28 m. length N/S), after excavations -</p>
