Your discussion: This is an oddly shaped cut which held backfill [30049] for pottery vessel emplacement [30047]. Pottery vessel was inserted at an angle of perhaps 45°. The cut however went much deeper than the bottom of the vessel. It appears that the cut may have originally been for an early placement of pottery which was removed and then ~~was~~ reused for vessel [30047]. Placement in square

Once excavated the cut appeared to have an oval, almost triangular shape
