Your interpretation:	<input checked="" type="radio"/> Internal	<input type="radio"/> External	<input type="radio"/> Structural	<input type="radio"/> Other (specify)											
Your discussion: This context is a lime washed floor surface, in L-shaped corridors between: wall 29000 and cut in bedrock [28849], 29047 - 2957 / 30838 - 32410; it is floor level contemporary with 29057, and earlier than floor surface 30806 of the second ramp. It has been badly damaged and its southern extent is not certain.															
<p>Placement in square</p> <p>It was fixed in several places (see context 30874) - it extends ^{fairly} underneath 32410 which is coming out. Gradually slopes from E to W; the surface is fairly undulating; appears rather flat between 29050 and 28849 → perhaps a corridor (flat) before the second ramp was constructed.</p>
