Your discussion:																
<p>This context is an obscure cut, associated with S. Hassan's activity in the area. It appears to be executed in order to close the walls 29047-30838 and 29050, as it follows the line of mud rendering on each of these walls. It cuts into the extensive wall collapse deposit: 29046-29045-29053-29925-30824-30883-28998. It has been recorded on the post-ex plans in 2007, but not featured. It's limits are not clear.</p>				<p style="text-align: right; font-size: small;">Placement in square</p>
