Your interpretation:  Internal     External     Structural     Other (specify)

Your discussion: FILL COMPOSED OF  
~~CRUSHED~~ ~~THE~~ CRUSHED Limestone and marl  
 it is resting on a pos. level resting on (30864);  
 it appears to be the 1st fill of cut [30867].  
 It's also possible that this deposit was pressed into the [30867] cut → the edges of the cut became visible only after ca. 10-15 cms ~~top~~ of 30862 has been excavated; though it still continued down
