Your discussion:																																			
<p>This context is a cut of a feature (purpose not clear) it was filled with 4 different fills and plastered with gypsum (30863); runs into our N. L. O. E.</p> <p>Seemed to be a burial at the beginning perhaps a drain -&gt; but then it shouldn't be lined with gypsum which is <u>not</u> a waterproof material.</p> <p>To high to be a coffin -&gt; that's what osteologists decided.</p> <p>It's location in the entrance in 29068 - is also puzzling.</p>

Your interpretation:    Internal    External <span style="border: 1px solid black; border-radius: 50%; padding: 2px;">Structural</span> Other (specify)																																					
Your discussion: This feature is most likely a cut of a drain cut into wall 30891 = 30889 = 30886 = 29062 (?), it was excavated in 2009 and during 2011 season only about 30cm was <del>visible</del> excavated (this portion was running into or 2009 l.o.e.) It appears to be blocked off by stones after <sup>32324</sup> it <del>was</del> had gone out of site
