Your interpretation:		Internal External Structural ? Other (specify)		
Your discussion:				
<p>This thin sandy silt deposit appears to be a patch/repair to floor surface 30839 in place where it had been worn down, between the doorjambs. It is situated directly underneath the wall collapse 30857 which appears to be reused as a step; its limit is more or less same as limit of 30857; it could also be just a thin layer of silt etc accumulated in the space between bottom of 30857 and the horizontal surface of 30839.</p>
