Your interpretation: <input checked="" type="radio"/> Internal <input type="radio"/> External <input checked="" type="radio"/> Structural <input type="radio"/> Other (specify)				
Your discussion:				
<p style="text-align: center;">it is possible that this deposit is a stone core of the E-W enclosure wall 29068 (on the E side of erosion channel cut [30826])</p> <p>This deposit is a stone core of either a blading wall between 29068 and 29062, or part of 29062. some stones from it could have been redeposited and become a part of 30837 → fill of erosion channel.</p>
