			32407																																		
Your interpretation: Internal External <u>Structural</u> Other (specify)																																					
Your discussion: This feature was initially interpreted as fill of a cut/pit → it became visible in surface of 30810; after closer look it appears to be a layer, <del>the</del> which continues under the floor and wall 29057; it is most likely the same make-up deposit as observed in adjacent section of slot B (see: 2003-63), context: 32406 (see: "Quick" context sheets), which was used as a bedding for both the wall 29057 and the floor (30810/32405). Needs further investigation.
