Type of feature: All of cut [30028]

Your interpretation: Internal External Structural Other (specify)

Your discussion: compacted silt wash with large stones. This may be the same layer as (30953) to the north, but they were separated b/c this layer has larger stones. This may be a trampled surface, part of the trample spilled onto the top of the cut [30028]. Occasional ash lenses mixed inside. * rusted bottle top found in trample, certainly modern and a bullet was found.
