				Draw profile overleaf	

Type of feature: **Cut**

Your interpretation: Internal External Structural Other (specify)

Your discussion:

This E-W cut was likely made in modern times, but not necessarily. It is filled with a dump of pebbly, bone, and silty material. The North side of the cut is along the wall of another Northern cut [30028]. The south side is into sand & lime stone crush (30997). The bottom of the cut ~~is~~ is marked by ~~and~~ a sand layer on the south and an undulating mudbrick collapse layer on the north. The eastern most part of the cut was over dug.

Placement in square
