Your discussion:																																					
<p style="text-align: center;">stone blocking off drain (?) opening</p> <p>One larger and flatter limestone is positioned upright, right immediately against the pos. opening of the drain: smaller stones and marl fragments seem to be filling the gaps.</p> <p>Other possibility is that these stones belong to 32921 abutting [30867] after it was loop out of use?</p> <p>Perhaps it is only preserved partially?</p>
