Your interpretation:     Internal     External     Structural     Other (specify)

Your discussion:    This deposit is a make up for the upper level corner  
 → very uneven (large limestone of 32913 pressed into it), consisting of broken mudbricks/marble, contains limestone, but visibly less than (32913). Some of the broken bricks appear to have either marl & render or lime wash.  
 Rests on top of marl crush (32928)
