|  |                                       |                         |                | Draw profile overleaf    |

Type of feature:

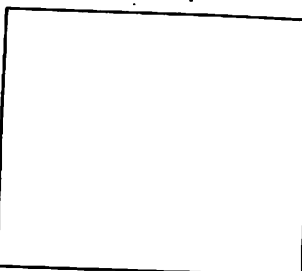

Stratigraphic Matrix

Your interpretation:    Internal    External    Structural    Other (specify)

Your discussion: This feature is possibly a large steel fall from either 29062, 29068 or another structure to the North of these walls; it runs into the N-L.O.E of the northern sandage; another possible interpretation = pos. wall? It is difficult to determine the nature of this context as only a small part of it is visible
