			32414																															
Your interpretation:		<input checked="" type="radio"/> Internal <input type="radio"/> External <input type="radio"/> Structural <input type="radio"/> Other (specify)																																
Your discussion: This context is mud plaster, which is the second episode of wall treatment on block 29062, laid on top of limestone 32414. It tip tips down to create floor surface 32411. It is preserved only at a lower level of 29062, where it was sealed by the only early retaining wall 32929. *It looks that it was used to cover up foundation 32970 for 29062, to create more even surface → and this is why it is not found anywhere higher on 29062.
