			32412	30855	= 30854																																
This context is			33026	= 33027																																	
			30852	= 30853																																	
Your interpretation:		Internal	External	Structural	Other (specify)																																
Your discussion: <p style="margin-left: 40px;">This deposit has been observed at the bottom of Slot B; it is limestone crush used to level the top surface of the more coarse and substantial deposit 30852-30853. It extends to the south onto the terrace as well as W and E, below later deposits. It is situated below floor-make-up/traumpe horizon 32412. It appears to have been truncated by erosion channel [30826]</p>
