Your interpretation:	Internal	External	<u>Structural</u>	Other (specify)																														
Your discussion:																																		
<p>This context is a thin make-up consisting of limestone crush; it is the same as deposit observed at the bottom of Slot B - 33026.</p> <p>It has not been identified in 2009, though and it was considered to be the 30852, the more coarse make-up, which is actually below it.</p>
