Discussion and interpretation: It is a wall of mudbrick, has two courses, the western face is headers, the eastern one is stretchers. This wall is abuted by <33302> blocking event, the door jamb <33333> and the door jamb <33293>. This wall forms the eastern wall of the room <sup>11288</sup> , and located between the last room and <del>11288</del> <sup>11286-11287</sup> . We notice that the middle of this wall is eroded because the crushed lime stone layer is out of the mudbrick.				

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.

Sketch Plan - Include grid co-ordinates, North arrow, and elevations.

Profile Sketch - State direction the elevation of the feature being drawn is facing e.g. 'West Facing Elevation of Feature .... If feature was drawn in section then include the grid co-ordinates and elevations.
