Discussion and interpretation: SE Circular silo located in SE corner of space 11237 to the south of NE silo (33437). more preserved comparing with NE silo - NO indication for door at the bottom of silo but the existence of 8cm step ?? or what seemed to be steps in the NW external corner of that silo might be refer to the place of the door? - see sketch on reverse					

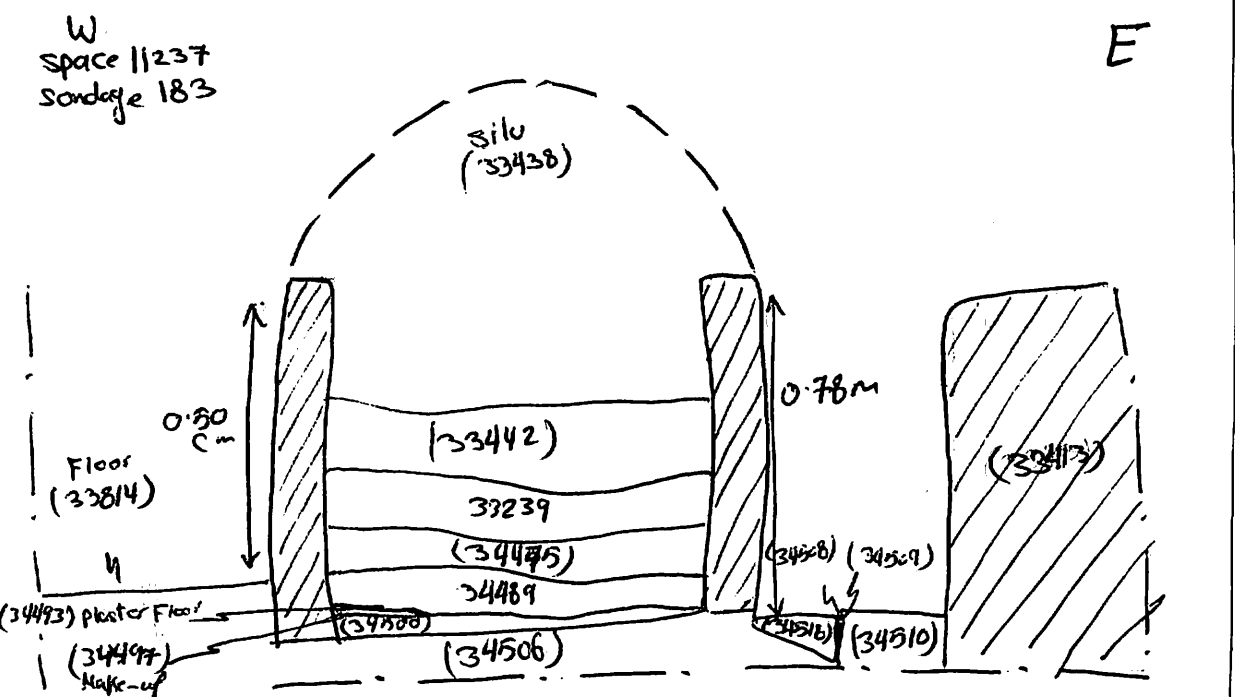

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.

Sketch Plan - Include square numbers, North arrow, space numbers, and elevations.
