Discussion and interpretation:

It is a wall of mudbrick, it measures 1.10m length by 0.60m width - its badly eroded. we notice that, the western face of this wall ends at ~~the~~ an eroded part, it might be the entrance (according to Selim Hassam plan), which it is located between the spaces (11302-11303-11304). the wall is abuted by <33470>, and <33472>.

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.

Sketch Plan - Include grid co-ordinates, North arrow, and elevations.
