Discussion and interpretation:

It is a blocking event of limestone, measures 0.60 m length by 0.50 m width, it seems to be an irregular shape; its purpose to block the entrance which located between the spaces (11300, 11301) as a modified event.

it is clearly that it is eroded, was mixed with mudbrick.

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.
