| Your discussion: | <p>cut possible by selim hassan for testing the foundation of the wall (33474, 33471), he might put some mudbricks units under this wall to support it, to not be collapsed.</p> <p>we notice that, Selim Hassan cleared that, there is an entrance between the spaces, (11303, 11304) in his plan.</p> <p>So, one can guess that, this entrance's door door jamb was very weak, so he decided to build support it by cutting the west-north corner in an oval shape, vertical sides.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
