Your discussion:					
<p>it is an oval shape cut, it may cut possibly by selim Hassan for testing the foundation of the walls <33477, 33471>, he might put some mudbricks under this wall to support it, it seems to be an irregular sides.</p> <p>we found the cut empty, but, there is a hollow under this wall, we can explain it as a place of unexisted mudbrick units; he used he supported this wall by putting some mudbricks under the entrance wall. the cut is located in the spaces (11303, 11304).</p>				<p style="text-align: center;">Placement in square</p> <div style="border: 1px solid black; width: 100%; height: 100%;"></div>
