Discussion and interpretation:

it is a mudbrick door Tamb (E-w), it measures 0.75 m by 0.60 m. It consists of two courses, the eastern one is ~~headers~~ stretchers, the western one is headers. It abuts the main northern wall < 33791 > and is abuted by a threshold < 33533 >.

It seems to be a modification event, because, there is a plaster (33804) layer between it and the wall < 33791 >. It is a door Tamb of the main northern-west entrance which leads to the purification house (webt).

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.

Sketch Plan - Include grid co-ordinates, North arrow, and elevations.
