Stratigraphic Matrix

Your interpretation: Internal External Structural Other (specify)

Your discussion:

Crushed limestone deposit as foundation deposit for Southern Causeway wall (33361). This wall was founded upon this crushed. it seems that he cut through deposit (33737) but he didn't fully truncated it and he built the wall (33361) on the other crushed (33742) which seems the same crushed, but we split between the two deposit stratigraphically.

This crushed (33742) abuts an earlier Nile clay wall ??? (33745) which extend under the Southern Causeway wall (33361)
