Discussion and interpretation:

It is a mudbrick doorjamb (N-S). It measures 0.65 m by 0.30 m. It consists of two courses, the northern one is header (one unit), and the southern face is headers. It is located between (11320, 11322).

It seems to be stuffed by a lime stone ^{spaces} fragments to support it. It consists the only entrance of the space (11320).

Remember: do not just draw the architectural feature in isolation. Show how it relates to surrounding features and include details of surface treatments, repairs/modifications/damage, bonding material(s), and associated cuts. Annotate all aspects of the feature or use a Drawing Key. Measurements must be included for all aspects of the feature and surrounding features.
