Date (dd/mm/yy): 12/6/08 EU: 2 SU: 5230

Description:

Top elev. S - 88.40m

N - 98.39m

high top (rock) - 98.47

- piece of flooring

- Charcoal

- the sub-floor goes all the way to the north-south wall, at the N. edge of scarp.

This means that the floor is associated with the N-S wall, & the pit (5230)

cuts into the floor. Is this a later alteration of the room to create a

trash pit? ~~What~~ what is the reason for this intrusion? Ashy patches in deposit.A lid ("smasher" (stone) found in situ

5230-1001

1448.31 N

-el. 55.36m

4450.10 E

- exactly like the one found S. of B-W wall ~~which~~ (5203-81) which was also found in pit in floor - correlation?

There was an ashy deposit throughout the SU measuring 20 cm N/S and 15 cm E/W. End elevations were 55.15 cm in the center, 55.12 cm in the South and 55.04 ~~at~~ the bottom elevation

SU: 5230

Description: Inside this SU are two stones that have been worked with a chisel. On the front face of both rocks there are obvious chisel marks. The one on the ~~west~~ Eastern side measures 30x30 cm while the one on the Southern side measures 25x33 cm. Both are standing upright so that only the tops are visible from a top view.
