Date (dd/mm/yy): 14/06/08 EU: 5 SU: 5409

Description: Excavating through the same sandy clay that we were excavating north of feature 5402-f2, but there seems to be a higher percentage of stones in it.

We've started to hit bedrock - and we haven't found any ash!

We've noticed a marked depression in the bedrock <sup>running N-S</sup> at about 4449.60 E. We're not sure if it is natural or a cut, but we will ~~excavate~~ excavate the soil within the depression as separate SU 5413.

Bottom elevations for 5409: NW: 55.07, ~~E~~  
SW: 55.10, SE: 55.06, NE: 55.06 m.a.s.l.
