Description:

We noticed the facis above the ash layer wasn't very visible & ceramics seemed embedded in the facis.

So we poked it back some & in fact, ceramics are embedded in the coursing, some fairly deep in the wall.

So, did a block fall away? ~~It~~ And ceramics tumble in. Seems highly unlikely. - they're in the coursing. Must be part of some construction process. Perhaps sealed w/ mudbrick? But we haven't found any. Any, face here seems really crappy, & ~~we~~ we must ~~go~~ account for ~~the~~ embedded ceramics. Seems they may have used pottery during construction.
