1

Date (dd/mm/yy): 2/6/12 EU: 16 SU: 5511

Description:

Continues under 5510, under the top soil. The soil is noticeably firmer here - more so than anywhere else in the EU so far. The SU turns up only very limited organics & small stones (pebbles, mainly, w/ some larger cobbles).

We close SU arbitrarily after articulation what is presumably the north face of the wall. The next SU should clarify fully. (see SU 5518)

This seems like more fill to me.
