SU: 7118

Description: This SU begins exc. of the fill under the floor, it seems (some came out in 7117). The soil is noticeably diff. than any we've encountered so far. It is silty & clayey - in fact w/ isolated pockets of clay appearing regularly (visible in scarp). The soil is far less pitted than earlier material.

This SU closed when we come into a large, mortar filled pocket in the south, adjacent to 7112 F1.

Context material consists of ceramics & plaster. -
