Summary _____

Opened: In order to excavate previously unnumbered mudbrick wall uncovered in '93 season.

Limits (N) Bounded by L18011 to the North.

(S) Bounded by L18004 to the South.

(E) Bounded by the mudbrick of W9408 to the East.

(W) Bounded by the unexcavated material below W9510 to the West.

Closed: Removed mudbrick matrix of wall and came down on matrix of fill and rubble.

Matrix: Brown mudbrick covering earlier courses of large 50-65cm stones with small 10-20 cm packing stones, similar to W9408, except that the mudbrick only covers and does not face the earlier stone core.

Relations: W18010 is covered by the previously excavated L9538, which may have contained the upper courses of W18010. W18010 is reached by the fill of L18011 to the North.

W18010 reaches the mudbrick exterior of W9408 to the East and is cut by pit L18004 to the South in its upper reaches. The bottom course of the upper mudbrick courses of W18010 is present in its entirety and is not cut by pit L18004. The lower stone courses of W18010 dovetail with the inner stone courses of W9408 to the East. F18004 reaches the upper mudbrick portion of W18010 to the South.

The upper mudbrick portion of W18010 cuts and covers L18084, which reaches the lower stone courses of W18010 to the South. L18085, which is the continuation of L18084 below also reaches the lower stone courses of W18010. F18041 reaches the lower stone courses of W18010 below L18085. The lower stone courses of W18010 cut the material of L18088 below F18041. Only the upper mudbrick portion of W18010 was removed. The lower stone courses remain.

Add Photos: 117216, 117379

Additional Observations/Value: Phase 7 mudbrick wall covering/built on Phase 8 (and earlier?) large stone wall. High Value.
