Summary

Opened: [L18028] AS UNSEALED AREA alongside W9704 to N. [L18028] is disturbed floor makeup of L9554 and fill below, which would have originally been sealed.

Limits (N) L9730, L9857 (below L9730)

(S) L18039

(E) L9730, L9857 (below L9730)

(W) L9300

Closed: [L18028] CLOSED when this debris locus reaching W9704 was removed. [L18028] and L18039 were collapsed from L18052 as their matrixes became indistinguishable, and both came down on destruction.

Matrix: Light brown sandy ^{dirt} underneath grey ash "floor", with some mudbrick. deb very non-exciting for small finds - quite a few animal bones however. very different than the sandy matrix with destruction mix of L18052 below.

Relations: [L18028] is covered but not sealed by F9554 due to several seasons ^{erosion/} exposure to F9554 which would have at one time sealed it.

To the north [L18028] continues into L9730 and L9857 below. (elevation L9857 = 13.72/65) the floor of L9857 was not found extending into [L18028].

To the south [L18028] continues into L18039

To the east [L18028] continues into L9730 and L9857 below.

To the west [L18028] is cut by pavement L9300.

[L18028] along with L18039 cover, but do not seal L18052 below.

Additional Photo #s: 117142, 117304

Additional Observations/Value: low value as it is remnants of a debris locus unexcavated clinging to the side of W9704. Its exposure makes the locus disturbed and unsealed.

#3

[* note: F9690 is wrong - should read F9554!]
