Summary

Opened: When L9903 came down on mudbrick surface (93 season). Locus divided into L9985, ash grey material, and L18065 (numbered in '94 season) a mudbrick platform

Limits (N) Debris below W9216 and W9085

(S) W9211

(E) W9904

(W) L9985

Closed: Removed mudbricks and mudbrick plastery material to F18065

Matrix: Some whole mudbricks and brick mortar. Bricks are red to dark brown, mortar lighter colored with some pottery and bones. Along the border with L9985 a series of at least 4 bricks could be traced length-wise in perfect alignment. This suggests a surface, not tumble. Other bricks were traced in the center of the locus but their orientation was less regular and there was more mortar used to "grout" the spaces between.

Relations: L18065 is covered but not sealed by L9903

On the north L18065 continues into the debris below W9216 and W9085

On the south L18065 reaches W9211 west of the seam in W9211. To the east of the seam W9211 begins to float ca. 15 cm above F18065, suggesting that the east portion of W9211 is a later addition.

On the east L18065 reaches W9904

On the west L9985 may cut L18065, though this is a matter of dispute.

F18065 also continues below W9216 and W9085 on the north. F18065 reaches both W9211 and W9904 in places. F18065 may also be cut by L9985. F18065 continues below L9903 on the east and south. F18065 seals L18089 below.

Additional Observations/Value: Has little value itself but provides sealing floor for material below which may provide answers about the cult place.
