Summary \_\_\_\_\_

Opened: WHILE TRACING F18394, IT WAS NOTED THAT MUDBRICK MATERIAL LAY IN THE DOORWAY BETWEEN W9909 AND W9998

Limits (N) BALK  
 (S) L18412  
 (E) W9909  
 (W) W9998

Closed: END OF SEASON (NOT CLOSED) → NEEDS FURTHER EXCAVATION

Matrix: RED (LIGHT) MUDBRICK MATERIAL WITH A HIGH CONTENT OF KURKAR (WHITE) INCLUSIONS IN BETWEEN TWO VERY BIG BOULDERS (FROM W9998 AND W9909) COMING DOWN ON SOFTER RED SOIL

Relations: ABOVE: [L18413] IS COVERED BUT NOT SEALED BY L18394  
 NORTH: [L18413] CUTS THE FILL OF L18398 AND L18409  
 SOUTH: [L18413] CUTS THE FILL OF L18394 AND L18412 AND F18394 AND IS CLEARLY DIFFERENT FROM IT IN MATRIX FOUNDATION MATERIAL  
 EAST: [L18413] REACHES W9909 AND ITS FT. BELOW (WHICH IS A LAYER OF HARD RED MUDBRICK)\*  
 WEST: [L18413] REACHES W9998 AND THE BALK UNDERNEATH\*  
 BELOW: NO RELATIONS (END OF SEASON)

\* THE LOWER PART OF [L18413] MATCHES THE MATRIX BELOW THE LOWEST COURSE OF W9909 THE MUDBRICK REACHED PART OF THE BIG STAKE FORMING THE DOORWAY BUT MOSTLY CONTINUED BELOW IT. THE SITUATION IS VISIBLE IN THE WEST ALTHOUGH W9998 WAS NOT REMOVED. W9909 AND W9998 ARE FLOATING IN [L18413] BUT ALL THREE WERE MOST LIKELY PART OF THE SAME BUILDING OPERATION  
 In other words, the material of [L18413] might be part of foundation laid along the E-W line of W9909 and W9998. The area of L18413, instead of having a wall placed on top of it, had a floor laid over it (certainly F18372, possibly F18394 was just not preserved well here)

Additional Observations/Value: MEDIUM VALUE: BLOCKED DOORWAY

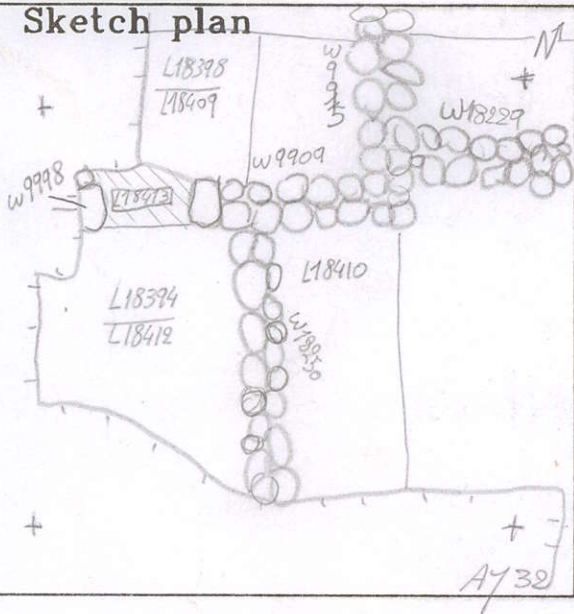

186613c

Locus

L 1841.3
