| summary: |  |  |  |  |  |  |  |  |  |

Opened: While removing L18447 above the sand lense L18460 was delineated along the S edge of the "plateau" requiring a new \# for the continuation down of the L18447 matrix.
Limits (N) L18446 (sealed portion of MSA)
(S) L18460 (sand lense/pit)
(E) L18402 ('99)
(W) Baulk under Roman cardo L9000

Closed: MSA of L18465 came down upon a thick plaster surface L18467, the bottom of the MSA in AI31.
Matrix: Successive layering of ashy grey matrix, dark brown matrix, thin clean sand lenses, thin brown clay layers, and thick burnt layers.
Relations: Layers in L18447, L18446 and 18465 all slope down to the S. The L18460 sand lense or fill in a shallow depression sits relatively flat. See section drawing on L18447 card.

L18467 is a continuation of the L18447 matrix.
Importance: Low value - limited extent with little pottery. (MB and LB!)
