Removed: 01/08/2000 Drawn? No

Integrity:

u

unit: -- *phase:* 11b *stage:* xii *stratum:* *PoM:*
summary:

Opened: Pit clearly visible in plaster L18472.

Limits (N) continues in under baulk.

(S)

(E)

(W)

Closed: Pit contents removed and plaster of L18472 continued below.

Matrix: Grey dirt and cobbles.

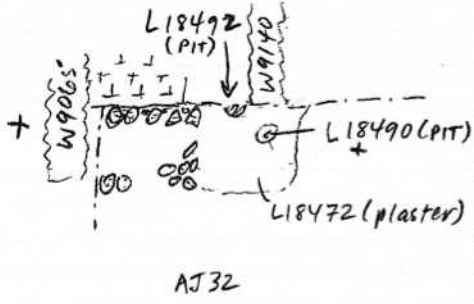

Relations: Pit L18492, as preserved in section, began ca. 25 cm higher than the preserved surface at the beginning of the 2000 season. L18400, a locus of stones above, likely, rendered it impossible to distinguish the stones of this pit from the stone scatter.

Importance: Low value - small pit with limited contents.
