*unit:* ---                      *phase:* 11b                      *stage:* xii                      *stratum:*                      *PoM:*  
*summary:*

**Opened:** Inferred from the depression continuing the NS line to the south of W18471 plus the multiple surfaces excavated to the E of W18471( L18472, L18497) stop along the presumed RT line

**Limits (N)** several stones of W18471

(S) L18485

(E) L18497

(W) L18488

**Closed:** Identified as a ghost feature

**Matrix:**

**Relations:** L18505 continues the N-S line of W18421 to the S. It apparently cuts the multiple surfaces of L18497 to the E and L18488 to the W. L18505 was covered with shells, following the contours of the depression ( of L18478)

**Importance:** High Value-part of phase 11- Enigmatic installation
