Summary _____

Opened: Technical: Our "transfer" to Area G, (beginning of Season here)

Limits (N) _____

(S) bank below W9279

(E) W18045

(W) bank AH-A6/33

Closed: when floor was observed (and mb wall 9989 defined)

Matrix: mix of compact brown silt with soft grey silt and a little crisy stuff

Relations: L18551 is a small triangular digging area (which made the digging difficult) it is adjacent to W18045.

Floor 18551: a very small patch of crushed kurkar was observed by W18045.

F18551 REACHES W18045 and seems to be cut by a pit. (see sketch)

this pit also cuts mb W9989.

The kurkar floor looks like those of L18553 and L18555

After defining W9989, the pit and the floor L18551 was closed

and below it we opened L18557 - the pit(?)

L18558 - the fill below floor
and W9989

Additional Observations/Value: L18551 is fill to floor in the Courtyard of the IT building
