7/02 EBS - see note on AJ32. L9079 baulk removal. Identified part of pit suggested to be part of AJ33, L9031, probably part of L9043 = L9168.

AFTER THESE 2 COURSES, W9040 ends in L9031\*  
 L9003 ALSO CUTS L9031 FOR cms. AND THEN ends in it and floats above L9043  
 \* and floats above L9042  
 IS '02: The complex 9031 = 9042 = 9043 = 9067 = 9168 is a complex of two pits (+ material between them). One is in the balk (restoration material referred to) and lacking a better name, is called 9042 (in AK 33) The other, on the E side of the unit, was eventually identified as pit 9168
