Summary: Phantom wall at the bottom of pit 0251

Description:

1 row of 6 mudbricks (stretchers), seen in the bottom of pit 0251 (phase is Persian pit). By the time we had excavated the deposits around it to the level of the wall (some 6 seasons later) the wall had eroded away (and remained numberless)

Relations: at the time of excavation it did not have any (apart from obviously being under pit 0251) level-wise, it goes under both W9140 and W9275 making it phase 10 (at least)
